About Nextrove

Nextrove leads the industry in Life Sciences Professional Services and Solutions. Our unwavering mission, “Empowering Clients to Improve Patient Safety,” propels us on the path to realizing our vision of becoming the first choice for Life Sciences professional services and solutions, in service of our clients, partners, and, above all, the patients we ultimately serve.

We are solely dedicated to providing solutions for Pharmaceutical, Biotech, and Contract Research Organizations. As a niche consulting firm assisting clients with Pharmacovigilance, Hosting, Artificial Intelligence Solutions, eTMF, RIM, Regulatory Affairs, Clinical Operations, Medical Information, Salesforce, and Integration Services, we take pride in our unique position in the industry.

The convergence of our business proficiency and technical expertise enables us to bridge the gap between business needs and technology, exceeding the expectations of our clients. Clients unequivocally choose us because our values align with theirs: integrity, expertise, client focus, and collaboration.

With over two decades of experience, we have guided clients in adapting to the evolving regulatory landscape. Our business experts have occupied leadership roles in pharmaceutical, biotechnology, and Contract Research Organizations, while our technology leaders have spearheaded efforts in implementing safety systems.

Our Services

At Nextrove, we specialize in providing end-to-end solutions for pharmacovigilance business. Our dedicated team of experts is committed to ensuring that your pharmacovigilance system is not only compliant with global regulatory standards but also optimized for efficiency and reliability.

Nextrove Cloud Hosting Solutions

Nextrove Cloud Hosting Solutions deliver superior cloud-based hosting services that cater to the distinct needs of businesses, ranging from shared hosting to dedicated servers. Partnering with AWS, Nextrove ensures dynamic scalability, allowing businesses to expand seamlessly while minimizing costs. Our solutions guarantee 99.99% uptime, fortified security, and continuous monitoring to keep your applications and data secure and operational round-the-clock. With customizable disaster recovery plans, we ensure your critical data is protected and quickly recoverable.

Nextrove Cloud Hosting Solutions provide comprehensive cloud-based hosting services that enable businesses to host their applications and databases securely, reliably, and efficiently. Nextrove Cloud supports a range of hosting options, including shared hosting, virtual private servers (VPS), and dedicated servers, ensuring optimal performance and flexibility.

Nextrove Managed Services

Nextrove Managed Services are tailored to meet the unique needs of the pharmacovigilance sector. Our services encompass system implementation, data management, regulatory compliance, and continuous support, enabling pharmaceutical companies to focus on their core mission of drug development and patient safety.

Nextrove Managed Services are designed to cut your system maintenance costs and deliver fast resolution to production issues, boosting your operational efficiency. With teams across the globe, we offer 24x7 access to our experts. Whether you need technical assistance for ongoing configuration management or functional support to troubleshoot business issues, we've got you covered.

Argus Safety Services

From seamless implementation of Argus Safety, to precise upgrades and smooth migrations, our expert team ensures your pharmacovigilance system remains robust and compliant with regulatory standards. We design Argus Safety implementations to fit your organization's unique needs. Our upgrade services to transition to an updated version of Argus Safety and leverage new features and enhancements, ensure minimal downtime, and comprehensive training for your team.

Our proven methodology minimizes risks associated with migrating from legacy systems to Argus Safety. We conduct thorough data mapping, validation, and testing to ensure operational continuity and data integrity.

ArisGlobal LSMV Services

Nextrove provides end-to-end management, consulting, custom development and managed services support for implementation of ArisGlobal LifeSphere Safety Platform Ecosystem including LifeSphere MultiVigilance (LSMV), LifeSphere Reporting and Analytics (LSRA), EvTriage and LifeSphere Signal and Risk Management (LSSRM). We configure and upgrade LSMV to fit your organization's unique business process needs. This includes configuring workflows, distribution rules and user interfaces to maximize usability and efficiency.

Our proven methodology minimizes risks associated with migrating from legacy systems to LSMV. We conduct thorough data mapping, validation, and testing to ensure operational continuity and data integrity.

Business Transformation

Nextrove has extensive experience in supporting business integration, business process re-design, systems assessment, development, and implementation of solutions.

Our Business Transformation workflow includes three phases:
Phase 1: Current "as-is" state: Assessment & Diagnostics
Phase 2: Future "to-be" state: Improvements
Phase 3: Implementation

Our Products

Our **PROGRESSIVE SUITE** of solutions significantly alleviates the most critical challenges in pharmacovigilance operations, with a wide range of products already in active use across numerous Pharmaceutical, Biotech, and Contract Research Organizations.

Our readily deployable frameworks and accelerators ensure swift and efficient project delivery.

INTAKE

(Multichannel Input Sources Powered by Gen AI)

INTAKE, our flagship product, is a powerful AI-driven system and can be configured based on your specific instructions. Providing a secure and scalable foundation for all your case management needs, INTAKE is designed to streamline the intake process, to enhance data accuracy, and ensure compliance.

INTAKE offers an unparalleled suite of features to revolutionize how you manage adverse events and product complaints. Powered by Gen AI, INTAKE enables rapid adoption and validation of any source data.

CONVEY

(Safety Documents Automated Distribution & Tracking)

CONVEY is designed to meet timely and secure communication by automating the distribution of safety documents to investigators around the world. Built on the reliable and secure Salesforce platform, CONVEY offers a comprehensive solution that simplifies complex processes, ensures compliance, and enhances the efficiency of global safety operations.

CONVEY is equipped with a range of features, each meticulously designed to address the unique challenges of safety document distribution in clinical research.

COMPLIANCE

(Automated Document Compliance Management)

COMPLIANCE, acts as an intelligent assistant for your safety team, providing end-to-end support for managing PSMF preparation and aggregate report preparation and submission.

From drafting to review and final submission, COMPLIANCE ensures your company remains fully compliant with industry standards and regulatory obligations.

AISQ

(AI Powered Safety Querying by End Users)

Managing safety data has never been easier with AISQ, Nextrove's groundbreaking AI-powered safety querying tool. Traditional methods of logging tickets, requesting reports, and running manual queries often consume valuable time and effort, delaying critical decision-making processes. AISQ transforms these outdated workflows, offering a faster, smarter, and more efficient way to access the information you need.

Designed as the industry's first AI-powered safety querying solution, AISQ provides 360-degree validated results, ensuring complete accuracy and reliability. Its intuitive interface allows users to perform effortless queries with just a few clicks, saving countless hours typically spent on manual data management tasks. Fully compatible with any safety database, AISQ integrates seamlessly into existing systems, enabling organizations to modernize their operations without the need for costly overhauls.

Whether you're generating complex reports or performing routine queries, AISQ empowers your team to focus on what truly matters: driving insights and ensuring safety compliance. It's time to say goodbye to the inefficiencies of traditional methods, and embrace the future of safety database management. Experience the simplicity and power of AISQ today.

GRT

(Automated Global Regulatory Triage)

GRT, Global Regulatory Triage, is a cutting-edge solution designed to meet the demands of today's complex regulatory environment.

Accessible directly from your safety application, GRT enables a smooth transition between tasks and reduces time spent on administrative activities. When direct connection with regulatory agencies' databases is allowed, the application automatically downloads files. Additionally, this application operates also on previously downloaded files to triage adverse events data and automatically transmit to your safety system.

GFA

(Global Follow-Up Automation)

GFA is designed to automate the end-to-end process of generating and sending follow-up queries and questionnaires to reporters, gathering vital information, and seamlessly integrating responses back into your system.

GFA assesses each case to determine missing information, automatically generates relevant questions to be included in query letters and questionnaires, delivers multilingual cover letters to reporters, and ensures clear communication across global regions.

GRRACE

(Global PV Reporting and Lifecycle Management)

GRRACE is designed to support maintenance of reporting rules in Argus Safety.

Built to streamline the entire process, GRRACE offers automated reporting rules design, testing, quality control, approval and deployment. It provides one single repository for all actions, and real-time visibility into the lifecycle. By integrating GRRACE into your operations, you can significantly reduce manual effort, accelerate reporting rule deployment, keep track of actions, and ensure compliance with regulatory standards.

CLINCONNECT

(Efficient, Secure, & Accurate Bulk Case Data Migration)

CLINCONNECT is specifically designed to meet integration or migration demands by offering an advanced platform for bulk data import into the Argus Safety application.

CLINCONNECT takes automation to the next level with its ability to automatically assess source data ensuring that your data is accurately coded, mapped, and transformed according to industry standards.

MICC

(Automated Medical Information Contact Center Operations)

MICC is a comprehensive solution designed to address the unique challenges of the pharmaceutical industry by integrating telephony, email, and case management into one secure platform. MICC empowers your team to deliver superior service while maintaining compliance with industry regulations.

MICC is an advanced, all-in-one solution meticulously crafted for pharmaceutical companies to streamline their contact center operations. Built on the trusted and secure Salesforce platform, MICC goes beyond traditional contact center tools, offering unparalleled functionality to manage adverse events, product complaints, and medical inquiries with ease and precision.

ANALYTICS

(Business Intelligence & Data Analytics Solution)

ANALYTICS provides a powerful platform for analyzing drug safety data. It is used as a source to create reports, dashboards, stories, and explorations.

ANALYTICS is effective for business to create reports and interactive dashboards and to provide meaningful insights helping the pharmacovigilance domain to analyze and make decisions on drug safety profile and protect patient safety.

NEXTROVE

Asia

Japan, China, & South Korea

Asia Dedicated Services

Nextrove Asia experts have in-depth background in pharmacovigilance and over a decade of consulting experience in end-to-end business processes and technical services.

Japan

Nextrove provides local and global support to Japanese companies in various countries. Our Japanese team members are fluent in native local language and English, and are experts in Japanese business practices and culture.

CASE STUDY 01: Global Oncology Company

• From Requirements to Data Migration, performed an end-to end implementation of Argus Safety and Argus Japan

• Implemented a fully integrated custom solution for Investigational Medical Device reporting to PMDA

CASE STUDY 02: Large-Sized Domestic Pharmaceutical Company

• Spearheaded the Data Migration from Argus Safety to LSMV

• Optimized the LSMV configuration and built custo reports in LSRA

CASE STUDY 03: Global Pharmaceutical Company with Regenerative Products

• Argus Safety Japan implementation including optimization of Business Configuration

• Implemented a fully integrated custom solution for Regenerative product reporting to PMDA

CASE STUDY 04: Multiple Clients

• Our team consistently engages with numerous clients to provide a wide range of services, including Regulatory Intelligence, Business Transformation, Subject Matter Expertise in Argus Safety, LSMV, Other Safety Systems, Technology, Data Migration, and Project Management

China

Nextrove provides local and global support to Chinese companies in various countries. Our Chinese team members are fluent in native local language and English, and are experts in Chinese business practices and culture.

CASE STUDY 01

• Performed an end-to-end Data Migration for a CRO from ArisG to Client Argus cloud through its system agnostic data migration tool Progressive ClinConnect and implemented gateway connection with multiple countries, including China CDE

CASE STUDY 02

• Performed an end-to-end Data Migration for a Global Oncology Biotech Company to migrate all case data to a local CRO. The cases from the source database were split across two single tenant databases based on the study protocols

South Korea

Nextrove provides local and global support to South Korean companies in various countries. Our South Korean team members are fluent in native local language and English, and are experts in South Korean business practices and culture.

CASE STUDY 01

• Cloud Hosting and Argus Safety Managed Services provider for a Global Oncology Company (subsidiary of a large-size South Korea based Company) and for a leading local Biotech Company

CASE STUDY 02

• Performed Data Migration and related activities from Arisg 7.4x to LSMV for a pharmaceutical company in South Korea
